

Professional Learning Partnerships

FACT SHEET

COHERENT INSTRUCTIONAL SYSTEMS

All students deserve access to worthwhile and meaningful educational experiences that prepare them for academic success. All teachers deserve support creating classroom environments where students can thrive. High-quality instructional materials allow teachers to better help students master skills and construct knowledge in the classroom. However, the adoption of instructional materials alone is insufficient to ensure that teachers are fully equipped to deliver high-quality instruction. These materials must be accompanied by professional learning opportunities.

The **Professional Learning Partnerships Initiative** is an effort to advance professional learning (PL) services. We work with partners to improve the availability and awareness of high-quality, standards-aligned instructional materials in English Language Arts, math, and science. We are also committed to supporting better implementation in the field. This support is particularly important in schools that address the needs of students who are Black, Latino, English Learner (EL)-designated, and/or affected by poverty.

The Coherent Instructional Systems portfolio of the K-12 Education Program aims to improve supply, demand, and implementation supports for instructional materials and professional learning practices optimized for students who are Black, Latino, EL-designated, and/or affected by poverty while building the evidence base for this approach.

Guided by the belief that every life has equal value, the Bill & Melinda Gates Foundation works to help all people lead healthy, productive lives. In developing countries, it focuses on improving people's health and giving them the chance to lift themselves out of hunger and extreme poverty. In the United States, it seeks to ensure that all people—especially those with the fewest resources—have access to the opportunities they need to succeed in school and life. Based in Seattle, Washington, the foundation is led by CEO Sue Desmond-Hellmann and Co-chair William H. Gates Sr., under the direction of Bill and Melinda Gates and Warren Buffett.
